

Cable crane carriage CableCar 30

with spool-out automatic

The real alternative
to diesel engine driven
spool-out systems.

The function

Remote control
(depends on
cable crane type)

Forceful clamps
for sky line and
hauling cable

Immediate closure
of both clamps in
case of hauling
cable break (2 sec.)

Spool - out via
discharge of
hydraulic
accumulators

Charging hydraulic
accumulators during
hauling cable pull - in

Hydraulic system steering via compact valve block

Control activation via key button (protection against discharge)

Generator charges while driving on sky line

Reliable hauling cable guidance

Easy change of clamp - wearing - parts

The advantages

no
fuel

no
noise

low
maintenance

Technical data

Load capacity 30 kN (3 t)

Spool out force at the beginning 1,6 kN (160 kg)

Spool – out support up to 80 m

Max. diameter sky line: 24 mm

Max. diameter hauling cable: 12 mm

Weight appr. 580 kg
